

**Agenda EPA Meeting with Tribal Leaders and Tribal Historic Preservation Officers
Regarding EPA Actions at the Proposed Dewey-Burdock Uranium ISR Site
The Kelly Inn in Bismarck, North Dakota
Thursday, September 10, 2015**

- I. Introductions

- II. EPA's General Tribal Consultation Policy

- III. The EPA's role at the proposed Dewey-Burdock uranium in-situ recovery site
 - a. The EPA Region 8 Underground Injection Control Program has received two types of UIC Permit Applications:
 - 1. A Class III Permit Application for the injection of lixiviant to mobilize uranium in the ore bodies.
 - 2. A Class V Permit Application for the disposal of ISR waste fluids into deep injection wells.
 - b. The UIC regulatory mission is to protect groundwater
 - c. UIC permitting process
 - d. Ways in which Tribal officials can engage in the public participation process:
 - Participate in the review of the permit and aquifer exemption decisions.
 - Request informational web conferences
 - Attend public hearings.
 - Participate in informal and formal government to government consultation.

- IV. Tribal Concerns
